

*We* hear you! Thanks to the 2006 and 2008 Lake Forest Resident and Business Surveys, we know that reducing traffic congestion, improving traffic flow, and improving traffic safety are top priorities for the community.

Your input has helped shape the City's 2009-2011 Capital Project Plan. Overall, the City has budgeted \$63.3 million over the next two years to improve and benefit the community.

Approximately 33%, or \$20.9 million, has been budgeted for traffic improvement projects throughout the city.

As always, a major component of any project is community input. We encourage your participation in this collaborative process, and welcome questions, comments, and opinions on any of the upcoming projects.

We look forward to making these projects a reality!

**We want to hear from you!**

# Traffic Improvement Projects 2009-2011

## 1 Alton Parkway Gap Closure & Commercentre Drive Improvements

The City and County are working together to close the gap on Alton Parkway. The County's project will extend Alton Parkway from Irvine Boulevard to Commercentre Drive, and the City's project will extend Alton Parkway from Commercentre Drive to Towne Centre Drive

## 2 Rancho Parkway Improvements

Improvements will include grading, curb and gutter, sidewalks, raised median, drainage, and street lights

## C Traffic Signal Synchronization

Will provide the communications infrastructure to support interconnection and enhanced coordination throughout the city

## 3 El Toro Road Streetscape Phase 1

From Muirlands to Jeronimo Road. Will implement traffic safety and congestion relief opportunities, and construct raised landscaped median islands and parkway landscaping

## 4 Jeronimo Road Streetscape Phase 1

From Los Alisos Boulevard to Miles Avenue. Will implement traffic safety and congestion relief opportunities, and construct raised landscaped median islands and parkway landscaping

C CITYWIDE

## 5 Rockfield Boulevard Streetscape Phase 1

From Los Alisos Boulevard to El Toro Road. Will implement traffic safety and congestion relief opportunities, and construct raised landscaped median islands and parkway landscaping

## 6 Trabuco Road Streetscape

From Bake Parkway to Lake Forest Drive. Will implement traffic safety and congestion relief opportunities, and construct raised landscaped median islands and parkway landscaping

## 7 Bake Parkway/Rue de Fortuna Traffic Signal

In addition to a new traffic signal, the project includes access ramps, pedestrian crosswalks, bus benches, and streetlights

## C Emergency Vehicle Traffic Preemption

30 traffic signals will be upgraded to incorporate technology that allows emergency vehicles to safely interrupt the traffic signal sequence

## C LFTM (Lake Forest Transportation Mitigation)

Improvements to 14 intersections citywide

## C Handicap Accessible Sidewalk Ramps

Approximately 600 sidewalk ramps will be renovated citywide

## C Installations of Streetlights

New streetlights are planned for residential and commercial areas throughout the city
